

# Social Distancing Guidelines

- Maintain 6 feet distance from others
- Avoid gathering in groups in all areas of the job (break rooms, tool lockup areas, etc.)
- Stagger contractor shift times when possible if working in the same area
- **You should practice social distancing on your jobsite because:**
  - COVID-19 spreads among people in close vicinities
  - You can show no symptoms and still spread the virus
  - Droplets from coughing, sneezing, and even talking can travel to another person and land in mouths, noses or even be inhaled
  - **THIS WILL SLOW THE SPREAD OF THE VIRUS**

Based on CDC guidelines current as of 4/4/2020. For additional information, please visit: <https://www.cdc.gov/>

## Getting to Work

- Avoid using the below forms of transportation to get to the work site
  - Taxis, Ubers, Lyfts, etc.
  - Carpooling
  - Busses
  - Trains

When you arrive on site, before traveling to your specific work area:

- Identify others working on site
- Identify the best route where maintaining social distancing is possible

## On The Job

- During work activity:
  - Be mindful of other workers and ensure 6 feet distance is maintained
  - Avoid having multiple employees on lifts, scaffolds, etc. that requires less than 6 feet distance
  - When possible, avoid tool sharing
  - Regularly clean surfaces and tools
- When taking breaks:
  - Do not gather in break rooms or common areas, eat separately when possible
  - Do not share food and prepare food at home
