

How to Clean and Disinfect

- Before cleaning and disinfecting, properly put on disposable gloves
- Clean frequently touched surfaces using soap and water
- CDC recommends use of EPA-registered household disinfectants:
 - <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
 - Make sure to follow instructions on the label of the product
- Diluted household bleach solutions can be used if appropriate for surface
 - Ensure it is not expired and follow the instructions from the manufacturer
- Alcohol solutions with at least 70% alcohol may be used
- Ensure safety data sheets are available on site for the product you are using

Areas / Objects to Clean and Disinfect

- All frequently touched objects should be cleaned and disinfected especially when using someone else's
 - Examples: Door handles, electronics (keyboards, touch screens, etc.), ladders, guard/handrails, light switches, toolboxes, gang boxes, paint bucket handles, vacuums, drywall tapers, paint rollers, window scrapers, suction cup window holders, and all other tools
- All frequently touched surfaces should be cleaned and disinfected
 - Examples: Countertops / sinks (in break rooms, in work areas, etc.), desks, and tables

How Often to Clean and Disinfect

- CDC recommends routine cleaning
- Employees should take responsibility for their tools / immediate work area
- Recommendation: Designate an employee and set a schedule throughout the workday for cleaning of common areas throughout the site
 - Examples: Break rooms, stairway handrails
